Airway Challenges in Neurological Patients

PRE-CONGRESS WORKSHOP

FEBRUARY 28, 2025 | 11:30-16:00

Simulation and CPR Training Center (SCTC),
Sor Tor Building, 16th Floor, King Chulalongkorn
Memorial Hospital

PROGRAM

11:30 - 12:00 Registration
12:00 - 13:00 Lunch
13:00 - 16:00 Workshop

DETAILS:

- Simulation-based learning, focusing on airway challenge cases involving neurological patients.
- Participants will have the opportunity to develop both technical and non-technical skills.
- The workshop will be led by experts in neurosurgical anesthesia and difficult airway management.

PROGRAM :

12:00- 13:00	Registration and Lunch
13:00- 13:40	Introduction Basic EEG, Interpretation of EEG Non-proprietary Parameters Choon Looi Bong Oversedation/Undersedation
13:40- 14:00	EEG Signatures of Different Anesthetic Agents Nophanan Chaikittisilpa
14:00-14:20	Age-Related Changes in EEG Choon Looi Bong
14:20-14:30	Q&A
14:30-14:45	Coffee Break
14:45-15:00	Neuromonitoring for Neurosurgical Patients (Different Approach for Probe Attachment) Taniga Klatchai
15:00-15:40	Case Studies in Adults and Children
15:40- 16:00	Q&A Showcase of Different Types of Available Processed EEG

OBJECTIVES :

1. Review the basics of EEG waveform and interpretation of processed EEG parameters and how this changes with anaesthesia.
2. Understand the various EEG signatures of different anesthetic agents.
3. Understand the age-related differences between the EEG in children, infants and neonates.
4. Understand the practical applications and limitations of EEG monitoring.
5. Understand how EEG monitoring can be used to guide anesthesia in adults and children by reviewing various case studies.

MODERATOR :
